Rollenwechsel vom Erfasser zum Koordinator

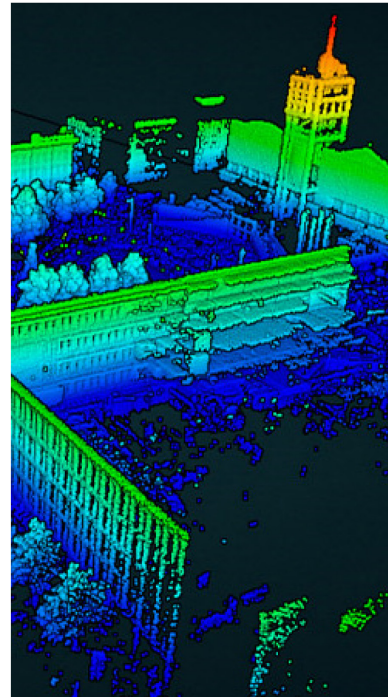

The background of the image features a complex, three-dimensional molecular structure. It consists of numerous dark blue spheres of varying sizes, representing atoms, which are interconnected by thin, light blue lines representing chemical bonds. The structure is dense and intricate, with many branches and loops, giving it a sense of depth and complexity. The overall color palette is a range of blues, from deep navy to a lighter, almost white, background.
